10. Please explain your rating above about AI's impact on your learning for this submission. (Write in
2-3 sentences) * 

It helped me when I was stuck and also taught me step by step. Also, if I had to do it entirely myself there is a good chance my quality of work wouldn't be as good due to time constraints, which means I might not have completed the assignment as thoroughly.

11. List the name all the AI tools that you used for this submission * 

Claude Sonnet, ChatGPT

12. How confident were you in AI's responses that you received? * 

- ☐ Confident
- ☒ Somewhat confident
- ☐ Neutral
- ☐ Somewhat not confident
- ☐ Not confident

13. How did you ensure the answer you received from the AI tool was correct? * 

I still did most of the bug fixes and design myself and told the AI exactly what I needed and knew what I was expecting in return. If what I got in return didn't match up with what I expected I fixed it myself or re-prompted. I knew how to see if it's correct because I have experience coding myself.

14. Did you at any point abandon using AI tools and seek other resources? Explain your answer. *

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

Not really, AI was able to help, and when it wasn't giving what I expected I filled in the gaps myself.

15. For each of the following items, how would you rate the relative contribution made by you versus AI? * 

Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself
